Perske Shaping Motors Flexibility for a diverse array of configurations.

In the fields of lumber and materials processing, there is an ever-increasing need for productivity and adaptability. Perske shaping motors rise to the challenge, with features that allow for a variety of shaping operations and a range of tooling options. Designed to handle light-duty or heavy-duty production, these motors increase efficiency in shaping applications for woodworking, plastics, composites, and sheet metals.

Features for versatility:

- A variety of direct tool mounting options including the popular HSK-C tooling interface, which results in excellent radial and axial precision cutting
- Ease of changing out custom tool templates for the profile design of a wide range of woodworking and material shaping jobs
- Optional shaft designs include an outside tool shank and inside bore, a special shaft for hydro-clamping systems, as well as a collet and covernut to allow for flexible shaping tool options

Features for performance:

- Low profile motors allow for deep woodcutting within tight and precise tolerances to contour arches and scale radius tops on wood, glass, or plastic surfaces
- A variety of machine bits and collet capacities on KNS motor types allows for shaping and profiling V-grooves, dovetails, beaded corners, and rounded edges
- Speeds range from 3,600 RPM to 30,000 RPM, and output levels vary from 0.2 HP to 17 HP to handle almost any production requirement
- KNS motors have an outside rib design and labyrinth seals for problem-free operation, even in dusty environments
- Low maintenance motors are equipped with lifetime lubricated bearings
- Precision balanced to ensure micron-quality run-out tolerances

Shaping gung

MOTOR SERIES TYPE	POWER OPTIONS (HP)	MAX. SPEED AVAILABLE (RPM)	MAX. SHAFT DIAMETER SINGLE BEARING	MAX. SHAFT DIAMETER DOUBLE BEARING	COLLET & COVERNUT	НЅК-С	HYDRO- CLAMP	SPECIAL DESIGN
KN 20	0.5 to 1	30,000	25 mm	20mm	Y	Ν	Ν	Y
KR 35	1.3 to 3	24,000	25 mm	25mm	Y	Ν	Ν	Y
KN 50	4 to 6.5	18,000	30 mm	30mm	Y	Y	Y	Y
KN 60	9.0	18,000	35 mm	50mm	Y	Y	Y	Y
KN 70	10 to 17	18,000	50 mm	50mm	Y	Y	Y	Y

TOOL SYSTEMS:	 Collet & covernut HSK-C Hydro-clamp chuck system (ETP HydroGrip) Quick clamping systems Cylindrical shaft with or without key Cylindrical shaft with or without key and outside thread Cylindrical shaft with or without key and inside thread Saw blade flanges and nut available Custom shaft design available to suit customer application
FREQUENCY:	 60 to 500 HZ (3,600 to 30,000 RPM) Electrical performance data (HP) are only valid for the stated constant frequency
VOLTAGE:	 230/400V standard according to DIN/VDE regulations; however, other voltage options are available Insulation class F standard If using a static frequency converter, it is necessary to use line reactors or filters to smooth out the sine wave
BEARINGS:	 Lifetime lubricated, high precision hybrid bearings (where required) Drive end bearing is fixed and non-drive end bearing is self-aligning With heavy tooling, double bearing arrangements are recommended for front bearing position to eliminate axial shaft play
FEATURES:	 TEFC motors are self-ventilated with a built in fan which works most effectively at the motor's maximum operating speed Labyrinth seals at both ends of the motor to protect against dust or particle penetration into the motor when under power Motors are balanced to a vibration speed of Veff = 1.8 mm/sec at zero load and rated operating speed Most motors are available according to NEMA or CSA standards (L.R. 16 865)
